## PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience designing and developing **scalable web applications**. Proficient in backend development with **Java, Spring Boot, and Microservices**, and frontend interfaces using **React.js, HTML, CSS, and JavaScript**. Strong database expertise in **MySQL & Oracle**, with cloud exposure in **Docker & AWS**. Achieved measurable impact including 20% higher system uptime and 30% better user engagement.

## TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, C Programming, HTML, CSS, Data Structures and Algorithms
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Microservices, React.js, Bootstrap, Tailwind, TypeScript
- **Databases:** MySQL, Oracle, H2 (Testing)
- **Tools & Platforms:** Git/GitHub, Maven, Docker, AWS, Postman, Jira, Swagger API, REST APIs, CI/CD
- **Testing:** JUnit, Mockito
- **Other:** Kafka, JSP, Agile Methodologies

## WORK EXPERIENCE

### Youlogix Infotech Pvt. Ltd.- Associate *Software Developer*

Dec 2022-Present

- Translated complex user requirements into **scalable enterprise solutions** using **Java, Spring Boot, and Microservices architecture** across the SDLC.
- Developed and maintained high-availability enterprise applications, **improving system uptime by 20%**.
- Engineered and deployed **robust RESTful web services** to enhance **system interoperability**.
- Collaborated effectively with **cross-functional Agile teams** to ensure technical feasibility of stakeholder requirements, enhancing development efficiency.

### Neo Nimbus IT- *Internship*

Sept 2022-Nov 2022

- Underwent training in **Core Java, Spring Boot, and MySQL** with exposure to real-world project development.
- Learned to develop **REST APIs** and connect them with a relational database.
- Performed **bug fixing, code reviews** under the guidance of mentors.
- Acquired practical knowledge of **Git, Postman, and Agile workflows**.

## PROFESSIONAL PROJECTS

### HealthPredict – *Disease Prediction Tool*

Aug 2024 – Present

Role: Full Stack Developer

- Developed and deployed **scalable backend services** using Java, Spring Boot, and **Microservices architecture** to handle patient health data efficiently.
- Designed and implemented **RESTful APIs** for seamless access to predictive disease insights by healthcare providers and external systems.
- Built an **interactive React.js dashboard** with advanced **data visualization** for doctors and patients to monitor real-time health risk scores.
- Optimized **MySQL database performance** with indexing, query tuning, and secure storage for large-scale patient records.
- Integrated **Apache Kafka** to build real-time, event-driven data pipelines enabling reliable streaming and processing of patient health events across distributed systems.

### UniEnroll – *University Admission Management System*

Role: Backend Developer

June 2023 – May 2024

- Developed critical **backend microservices** for automated student application processing, eligibility verification, and efficient seat allocation.
- Engineered a **secure, role-based authentication and authorization system** using **JWT** for robust access control across student, administrator, and faculty portals.
- Built **secure REST APIs** for seamless **third-party integrations** with university portals and external verifiers.
- Executed MySQL query optimization and backend performance tuning to efficiently handle a **50% increase in transaction volume** during peak admission periods.

- Contributed to reducing admission processing time by **30%** through strategic **system optimizations** and **process improvements**.

---

## EDUCATION

**Bachelor of Science (B.Sc.)**

*Sept 2020 – May 2023*

Chhatrapati Shahu Ji Maharaj University, Kanpur.
